- Executive Hiring
- Graduate Hiring
- Staff Augmentation
- Recruitment Process Outsourcing

Our Practices

TESTQ focus within few specialist technology practices, allowing us an in-depth technical appreciation of both our clients IT roles and the candidates we represent. With in house technology practices and our industry expertise we are able to source the most talented permanent and contract professionals across the whole range of IT. We focus on both core and niche development technologies ensuring we are in touch with the market drivers and key issues facing development professionals.

ETHICS

We believe in partnership with our clients. This not only gives us a greater understanding of the business needs, but also allows us to understand the cultural fit and soft skills required.

OUR APPROACH

We will deliver the right candidate matching your requirements. We achieve this by gaining an in depth understanding of their business and requirements then proactively hunting suitable candidates from relevant organisations using extensive networking, database searching, SEO, PPC and web advertising campaigns.

Exclusive Client Relationship

We work with number of our clients as a sole supplier. Working this way provides a number of powerful benefits to both parties. We usually ask you to let **TESTQ** Tech work on the vacancy for the first 24 hours on a sole / preferred supplier basis. This gives us the time needed to source the best candidates, brief each one thoroughly, prepare CVs and arrange interviews. Within 24 hours of receiving a requirement (if not sooner) we will be able to tell you if we can find enough suitable candidates. If we are not confident of having three strong candidates within the first 3 days, we will be honest!

ADVANTAGES

- We can reduce our percentage rate as an exclusive requirement to us.
- Easier to control & management - You will have one point of contact and one source for CVs.
- It gives us more time to thoroughly select the strongest candidates instead rushing to deliver candidates before other agencies.
- Our highest priority is given to the vacancies of clients to whom we are exclusive supplier, because the client has placed their trust in us

Objective

“ IT recruiting is always challenging, and top talent is tough to find. Technology industry worldwide is dynamic and is going through a phase of transformation. The recruiting changes as fast as technologies themselves. We prefer consultative approach and personable service that aid in providing the right candidate to the client managing an effective application process and mapping candidate profile with client requirement objectively. ”

Why Us?

SPEED OF EXECUTION

We have right experience, processes and skills in place to understand your software services needs and have an ability to respond in the shortest timescales.
